

Fact sheet: Aden Indonesia Driving the IFM transformation in ASEAN

Aden Indonesia provides ESG-focused facilities management service. We focus on pairing innovative digital services with client-first, hands-on service. Aden leverages its global network and strong presence in Indonesia to help clients rethink FM as more than just cleaning and maintenance, and begin seeing sustainability as an everyday practice, enabled by emerging technologies and community partnerships.

Our Services

Technical Asset Management

Keeping the critical systems like water, electricity, heat and cooling online is of vital importance. Aden provides a fully digitalized solution and makes it visible to asset owners via digital dashboards.

Energy Management

Decarbonizing is a critical step in ESG, and Aden employs a full-time staff of energy engineers to make that transition possible. Aden has partnerships with leading energy companies like Total Solar to bring expertise and resources to bear.

Camp Management

Our complex site management for the mining, hospitality and government sectors is a holistic approach covering housing, operations, logistics, energy and more. Aden is proud to service over 550,000 m2 of client assets.

Facilities Management

Managing a facility or office is often a hidden cost sink for a business, and Aden reduces those costs while providing security, foodservice, and cleaning.

Key Product

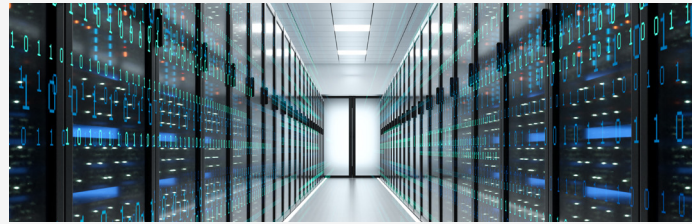

Supply Chain and Logistics Management

A sustainable supply chain is a key component of meeting ESG goals. Not only will it improve business operations' resiliency, it will improve corporate image. Aden can help manage the transition to a transparent, low-carbon, low-waste, socially-responsible supply chain.

Akila Digital Twin

Akila is an ESG-first digital twin, enabling a whole new level of management. Combining visualized 3D models of operations, simulation, AI, CMMS, and energy management, Akila enables your business to unlock hidden efficiencies across the entire lifecycle of the built environment.

Comprehensive Facilities Management

Aden provides a locally managed suite of services for facilities management, ranging from the traditional, such as gourmet foodservice, cleaning, and security, to the digital, environmental, and technical aspects of FM ofte overlooked by clients.
